**b**uma CONEXPO India 2018 (bc India) will be a good platform to launch new products range and will provide a whole new market. Sharp Ply hinges hopes on the expo this edition for greater interface with a number of new clients, as the event is regarded as a well-recognised platform for construction-related business, whether it is machinery, product or technology.

The company plans to launch new system formwork with German made H Beams / Birch Ply solution, among other solutions in the expo.

Sharp Ply being one of the widely recognised brands across India is known for its involvement in the fields of Architecture, [English](#) Construction, Interiors, Sports Flooring's, Automotive Body Building, Industrial Patterns and Dies and Packing and Palleting. Company that has a headquarters in Bangalore has a wide presence across various cities of India.

The brand is also known for its innovative concepts and has an excellent networking with deep inroads into a broad spectrum of industry.

"We hope to have good business opportunity after this exhibition. In continuation, we have also decided to participate in Bauma Germany-Munich coming year with our international partner Mywood," says Paras Kumar, Director, Sharp Ply (India) Private Limited.

India is an emerging market and lot of infrastructure and residential projects are on their way to get launched. And, without proper system formwork solution, it is very difficult to meet deadlines. "We see good demand in future for system formwork, as this is the only way out which is faster, cheaper in the solution options to achieve accurate finishes, adds Kumar.
